FILE INFORMATION

File Name: UnCrackable-Level1.ipa
Size: 0.27MB
MD5: 4a194577fa84b00960c49bf031397396
SHA1: 97d61d47d1a38a87eff210d41205cbf05363914a
SHA256: 8ade899b5f574f92dc2f1fb9fcf7093d9c6297e288985526391279cc5ae1db0f

APP INFORMATION

App Name: UnCrackable1
App Type: Objective C
Identifier: sg.vp.UnCrackable1
SDK Name: iphoneos10.2
Version: 1.0
Build: 1
Platform Version: 10.2
Min OS Version: 8.0
Supported Platforms: iPhoneOS,

BINARY INFORMATION

Arch: ARM
Sub Arch: CPU_SUBTYPE_ARM_V7
Bit: 32-bit
Endian: <

APP TRANSPORT SECURITY (ATS)

NO	ISSUE	SEVERITY	DESCRIPTION

IPA BINARY CODE ANALYSIS

HIGH: **0** | WARNING: **2** | INFO: **0** | SECURE: **0** | SUPPRESSED: **0**

NO	ISSUE	SEVERITY	STANDARDS	DESCRIPTION
1	Binary makes use of insecure API(s)	warning	**CWE:** CWE-676: Use of Potentially Dangerous Function **OWASP Top 10:** M7: Client Code Quality **OWASP MASVS:** MSTG-CODE-8	The binary may contain the following insecure API(s) _memcpy , _strlen
2	Binary makes use of malloc function	warning	**CWE:** CWE-789: Uncontrolled Memory Allocation **OWASP Top 10:** M7: Client Code Quality **OWASP MASVS:** MSTG-CODE-8	The binary may use _malloc function instead of calloc

IPA BINARY ANALYSIS

PROTECTION	STATUS	SEVERITY	DESCRIPTION
NX	False	info	The binary does not have NX bit set. NX bit offer protection against exploitation of memory corruption vulnerabilities by marking memory page as non-executable. However iOS never allows an app to execute from writeable memory. You do not need to specifically enable the 'NX bit' because it's always enabled for all third-party code.
PIE	True	info	The binary is build with -fPIC flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.
STACK CANARY	True	info	This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.
ARC	True	info	The binary is compiled with Automatic Reference Counting (ARC) flag. ARC is a compiler feature that provides automatic memory management of Objective-C objects and is an exploit mitigation mechanism against memory corruption vulnerabilities.
RPATH	True	warning	The binary has Runpath Search Path (@rpath) set. In certain cases an attacker can abuse this feature to run arbitrary executable for code execution and privilege escalation. Remove the compiler option -rpath to remove @rpath.
CODE SIGNATURE	True	info	This binary has a code signature.
ENCRYPTED	False	warning	This binary is not encrypted.
SYMBOLS STRIPPED	True	info	Debug Symbols are stripped
