

## IOS STATIC ANALYSIS REPORT

🍏 DVIA-v2 (2.0)

File Name:

DVIA-v2.ipa

Identifier:

com.hightitudehacks.DVIAswiftv2

Scan Date:

Aug. 5, 2025, 7:12 a.m.

App Security Score:

42/100 (MEDIUM RISK)

Grade:

Trackers Detection:

3/432

## ☰ APPLICATION PERMISSIONS

PERMISSIONS	STATUS	INFO	REASON IN MANIFEST
NSCameraUsageDescription	dangerous	Access the Camera.	To demonstrate the misuse of Camera, please grant it permission once.
NSFaceIDUsageDescription	normal	Access the ability to authenticate with Face ID.	The app needs FaceID permission

## 🔒 APP TRANSPORT SECURITY (ATS)

HIGH: 1 | WARNING: 0 | INFO: 0 | SECURE: 0

NO	ISSUE	SEVERITY	DESCRIPTION
1	App Transport Security AllowsArbitraryLoads is allowed	high	App Transport Security restrictions are disabled for all network connections. Disabling ATS means that unsecured HTTP connections are allowed. HTTPS connections are also allowed, and are still subject to default server trust evaluation. However, extended security checks like requiring a minimum Transport Layer Security (TLS) protocol version—are disabled. This setting is not applicable to domains listed in NSExceptionDomains.

## ⌘ IPA BINARY CODE ANALYSIS

NO	ISSUE	SEVERITY	STANDARDS	DESCRIPTION
----	-------	----------	-----------	-------------

NO	ISSUE	SEVERITY	STANDARDS	DESCRIPTION
1	Binary makes use of insecure API(s)	warning	<b>CWE:</b> CWE-676: Use of Potentially Dangerous Function <b>OWASP Top 10:</b> M7: Client Code Quality <b>OWASP MASVS:</b> MSTG-CODE-8	The binary may contain the following insecure API(s) _fopen , _memcpy , _printf , _sscanf , _strcpy , _strlen , _strncpy
2	Binary makes use of the insecure Random function(s)	warning	<b>CWE:</b> CWE-330: Use of Insufficiently Random Values <b>OWASP Top 10:</b> M5: Insufficient Cryptography <b>OWASP MASVS:</b> MSTG-CRYPTO-6	The binary may use the following insecure Random function(s) _random
3	Binary makes use of Logging function	info	<b>CWE:</b> CWE-532: Insertion of Sensitive Information into Log File <b>OWASP MASVS:</b> MSTG-STORAGE-3	The binary may use _NSLog function for logging.
4	Binary makes use of malloc function	warning	<b>CWE:</b> CWE-789: Uncontrolled Memory Allocation <b>OWASP Top 10:</b> M7: Client Code Quality <b>OWASP MASVS:</b> MSTG-CODE-8	The binary may use _malloc function instead of calloc
5	Binary uses WebView Component.	info	<b>OWASP MASVS:</b> MSTG-CODE-9	The binary may use UIWebView Component.

## 🔍 IPA BINARY ANALYSIS

PROTECTION	STATUS	SEVERITY	DESCRIPTION
NX	False	info	The binary does not have NX bit set. NX bit offer protection against exploitation of memory corruption vulnerabilities by marking memory page as non-executable. However iOS never allows an app to execute from writeable memory. You do not need to specifically enable the 'NX bit' because it's always enabled for all third-party code.
PIE	True	info	The binary is build with -fPIC flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.

PROTECTION	STATUS	SEVERITY	DESCRIPTION
STACK CANARY	True	info	This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.
ARC	True	info	The binary is compiled with Automatic Reference Counting (ARC) flag. ARC is a compiler feature that provides automatic memory management of Objective-C objects and is an exploit mitigation mechanism against memory corruption vulnerabilities.
RPATH	True	warning	The binary has Runpath Search Path (@rpath) set. In certain cases an attacker can abuse this feature to run arbitrary executable for code execution and privilege escalation. Remove the compiler option -rpath to remove @rpath.
CODE SIGNATURE	True	info	This binary has a code signature.
ENCRYPTED	False	warning	This binary is not encrypted.
SYMBOLS STRIPPED	False	warning	Debug Symbols are available. To strip debugging symbols, set Strip Debug Symbols During Copy to YES, Deployment Postprocessing to YES, and Strip Linked Product to YES in project's build settings.
